I am a researcher mainly interested in human behaviour, as well as quantitative methods and reproducible science.

## About me

---

I am an Associate Professor and researcher at **EvoCo: Human Behaviour and Evolution Lab**, and leader of the **CODEC: Cognitive and Behavioural Sciences Research Group** (classified as **A1**), within the **Faculty of Psychology** at the **Universidad El Bosque** in Bogotá, Colombia. I am also a founding and board member of the **Latin American Association for Human Behavioral and Evolutionary Sciences (LAAHBES)**.

**Research:** My work focuses on human vocal communication, mate choice, musicality, and hormonal influences on behaviour. I have published pioneering studies on vocal modulation in social and courtship contexts.

**Open Science:** I am interested in quantitative methods and programming, especially in **R**, as tools to promote open and reproducible science. In line with these values, I serve as a **recommender** (associate editor) at **Peer Community In Registered Reports**, and **Data Editor** at **Proceedings of the Royal Society B**.

## Skills

---

### Programming
