I am a researcher mainly interested in human behaviour, as well as quantitative methods and reproducible science.

About me_

I am an Associate Professor and Researcher at **EvoCo**: Human Behaviour and Evolution Lab, and leader of the **CODEC**: Cognitive and Behavioural Sciences research group (classified as **A1**), Faculty of Psychology, at Universidad El Bosque in Bogota, Colombia. I am also a founding and board member of the **Latin American Association for Human Behavioral and Evolutionary Sciences** (**LAAHBES**). My research primarily focuses on human vocal communication, mate choice, and musicality, as well as bioacoustics, psychoacoustics, and hormonal effects on human behaviour. I have published some of the first articles demonstrating within-individual changes in voice pitch in response to the social status of the listener, as well as the significant effects of voice modulation on listeners in courtship contexts. Passionate about quantitative methods and **R** programming, I advocate for reproducibility and open science. In line with these values, I serve as a recommender (editor) for Peer Community In Registered Reports.
