I am a researcher mainly interested in human behaviour, as well as quantitative methods and reproducible science.

About me

I am a Full Professor and researcher at ***EvoCo**: Human Behaviour and Evolution Lab*, and leader of the ***CODEC**: Cognitive and Behavioural Sciences Research Group* (classified as **A1**), within the Faculty of Psychology at the Universidad El Bosque in Bogotá, Colombia. I am also a founding and board member of the ***Latin American Association for Human Behavioral and Evolutionary Sciences*** (***LAAHBES***).

Research: My work focuses on human vocal communication, mate choice, musicality, and hormonal influences on behaviour. I have published pioneering studies on vocal modulation in social and courtship contexts.

Open Science: I am interested in quantitative methods and programming, especially in **R**, as tools to promote open and reproducible science. In line with these values, I serve as *Data Editor* at Proceedings of the Royal Society B, *Associate Editor* at Evolutionary Dynamics of Human Behavior (EDHB), and as recommender (associate editor) at PCI Registered Reports. I also direct **MetaCiencia**, a research incubator on reproducibility and open science.
