I am a researcher mainly interested in human behaviour, as well as quantitative methods and reproducible science.

About me

I am a Full Professor and researcher at ***EvoCo**: Human Behaviour and Evolution Lab*, leader of the ***CODEC**: Cognitive and Behavioural Sciences Research Group* (classified as **A1**), and director of the ***MetaCiencia*** research incubator, within the Faculty of Psychology at the Universidad El Bosque in Bogotá, Colombia. I am also a founding and board member of the ***Latin American Association for Human Behavioral and Evolutionary Sciences*** (***LAAHBES***).

Research: My work focuses on human vocal communication, mate choice, musicality, and hormonal influences on behaviour. I have published pioneering studies on vocal modulation in social and courtship contexts.

Open Science: I am interested in quantitative methods and programming, especially in **R**, as tools to promote open and reproducible science. In line with these values, I serve as *Data Editor* at Proceedings of the Royal Society B, *Associate Editor* at Evolutionary Dynamics of Human Behavior (EDHB), and as recommender (associate editor) at PCI Registered Reports. In 2026, I also founded and now direct ***MetaCiencia***, an open research incubator on scientific reproducibility, transparency, and metascience education, affiliated with CODEC.

Skills

Programming	**R** (advanced: all data wrangling, analysis, plots and tables —and even this CV— made in R)

Research Supervision

Postgraduate

The Faculty of Psychology at Universidad El Bosque does not offer research degrees, and all M-level courses are professional masters. Because of this, opportunities to supervise postgraduate students are limited, and most of my postgraduate supervision has been external.
